

Moltex diapers for premature and small babies

These are times when a newborn baby needs that extra special care and attention

Moltex Research has worked together with two University Hospitals in the first development of its kind a diaper for premature and small babies

Special features of Moltex premature and small baby diapers:

- each size fulfills the special requirements of weight and size
- each diaper is light with resealable tapes which may be opened and sealed more quietly so as to not disturb your baby
- each diaper has an absorbent pad which has been specially designed to fit your baby's needs
- each diaper has been specially designed with a cut out profile to protect your baby's navel.
